

## ***Thank you Villa Maria High School***

The MUHC Patient Education Office salutes Villa Maria High School, its staff and its students. Their steadfast support over years has made a tremendous difference to the understanding and well-being of our patients and has been helpful to our clinical students and staff.

A recent patient said, "Understanding and knowing what to expect made a huge difference in lowering my stress level. The website and the booklet was so clear and comprehensive. Without it, I was facing a complete unknown. With what I read, I knew what was coming and that allowed me to feel I had some control."

Without the yearly support from Villa and other sponsors, we would not have been able to provide this service to our patients. Even this year, in spite of the restrictions imposed by COVID, the students at Villa Maria raised over \$12,000. Amazing! We are very grateful.

The materials made possible by VM are integral to our patient care and clinical education; however, they reach far beyond the MUHC community. Requests from institutions are received from all over the world and we can freely share what we have done because of the fundraising efforts of the students at Villa. Hats off to them!

Dr. David Fleiszer, on behalf of  
the McGill University Health Center  
Patient Education Office.
